

Bellefonte Area School District Acceptable Use and Email Agreement

Bellefonte Area School District provides Gmail accounts to employees for educational and administrative purposes. Secondary students are provided with Gmail accounts for educational use. The use of email is a privilege, not a right. Any information sent via email becomes a district record that may be accessed and its contents disclosed by the Bellefonte Area School District. District personnel may elect to use group email to communicate with students or parents in regard to information of educational value and/or school assignments or programming. The distributions lists should only be used to send school related messages. Avoid sending or forwarding chain messages, items for sale and other non-school related messages.

I have read the Bellefonte Area School District Acceptable Use of Network and Internet Access Policy (#815) and the Electronic Mail Policy (#816) agree to follow them.
